Operated by JSV Innovations Pvt. Ltd.

About Us

CRDT, IIT Indore has signed an MOU with JSV Innovations Pvt. Ltd. for establishing and operating a centre for training rural youth as paramedical technicians within the premises of IIT Indore. India suffers from a severe shortage of trained paramedical personnel (Allied Health Professionals - AHP). This, plus the expected continued growth of the health sector, will create thousands of AHP jobs.

“School for Skills: Allied Health Sciences”, an academic institution for AHPs was established in 2013 in West Bengal by specialist doctor-founders. Today, powered by the performance of our students working across the country, we have grown to be present in 6 states in India
