————— A unit of JSV Innovations Pvt Ltd —————

Registered Office: 44A S.P Mukherjee Road, Kolkata, West Bengal, 700026

About Us

India suffers from a severe shortage of trained paramedical personnel (Allied Health Professionals AHP). This, plus expected continued growth of the health sector, will create thousands of AHP jobs. On this backdrop, “**School for Skills: Allied Health Sciences**”, an academic institution for AHPs was established in 2013 in West Bengal by specialist doctor-founders with substantial knowledge and cumulative experience of what constitutes a good AHP. Today, powered by the performance of our students working across the country, we have grown to be present in 6 states in India

Over 4500 youth have been trained, 60% being women, 70% from low-income families, 30% from rural areas. Over 70% of our students are in formal sector employment in healthcare institutions that include some of the biggest names in India
